

Accumulators - Bladders

Standard Nitrile Replacement Bladders

EPE Italiana s.r.l.

Bladders

- EPE bladders consist of two separable parts, the rubber bladder, and the gas valve that is seal connected to the bladder. These parts are available separately, or combined as a fully assembled bladder.
- EPE Bladders are readily interchangeable with many other brands available in the market, in order to make the conversion, gas Valves with non standard stem diameters and connections are available (See EPE Italiana Gas Valves)

Capacity (liters)	Standard Nitrile Bladders (ISO: NBR)	
	Part Number Excl. Std EPE Gas Valve	Part Number Incl. Std EPE Gas Valve
0.2	S0.2 P0	S1.2 P1
0.7	S0,7 P0	S1.7 P1
1	S1 P0	S1 P1
1,5	S1,5 P0	S1,5 P1
3	S3 P0	S3 P1
5	S5 P0	S5 P1
10	S10 P0	S11 P1
15	S15 P0	S15 P1
20	S20 P0	S21 P1
25	S25 P0	S25 P1
35	S35 P0	S35 P1
55	S55 P0	S55 P1

For special Hydrogenated Nitrile Bladders (HNBR) for use in extreme operating temperature ranges, contact the call centre
