

Vane Pumps - Selection

V10, V20, V2010, V2020 Series Vane Pumps

- Applications: Industrial and Mobile
- Pressure Rating: Up to 172 Bar Continuous
- Displacement: From 6,5 to cc/rev to 42.4 cc/rev
- Speeds: Up to 2750 rpm
- Available in Single Stage or Double Stage Configurations

VQ Series Vane Pumps

- Applications: Industrial and Mobile
- Pressure Rating: Up to 210 Bar Continuous
- Displacement: From 18 to cc/rev to 193,4 cc/rev
- Speeds: Up to 2700 rpm
- Available in Single Stage, Double Stage and Thru-drive Configurations
- Incorporates Replaceable Cartridge Design
- For a combination of maximum horsepower in a small package, high efficiency, serviceability and economy,
- Vickers "high output" pumps are unequalled anywhere in industry.
- Vickers high speed-high pressure pumps give more staying power – they last.
- Their workhorse ruggedness has been proved on the newest types of giant earth-moving equipment.

VMQ Series High Pressure Vane Pumps

- Applications: Industrial and Mobile
- Pressure Rating: Up to 280 Bar Continuous
- Displacement: From 10 to cc/rev to 240 cc/rev
- Speeds: Up to 2700 rpm
- Available in Single Stage, Double Stage, Triple Stage and Thru-drive Configurations
- Incorporates Replaceable Cartridge Design
- The latest state-of-the-art Vickers™ VMQ fixed displacement vane pumps set new standards of performance and efficiency for both industrial and mobile applications
- The new VMQ series features design enhancements in all areas, resulting in a unique combination
- of higher pressure capabilities and outstanding low noise levels.
