Recent Appointment at BMG

Gavin Kirstein has been appointed as the Tsubaki Product Manager for BMG.

As part of BMG's Power Transmission division, Kirstein will focus mainly on Tsubaki engineered class chain, bucket elevators, cam clutches and backstop products, used in heavy and large scale industries.

Kirstein has a wealth of experience in identifying, evaluating and promoting solutions for the application of power transmission and conveying of products, to meet specific customer requirements.

His sound technical knowledge and vast experience are enhanced by the implementation

of strategic objectives and a track record for excellent relationships with customers and suppliers.

BMG has been the sole distributor for Tsubaki locally since the late 1990's. Typical applications for Tsubaki power transmission components are in cement plants, ports and container handling facilities, automotive manufacturing and assembly, mining and quarrying, steel mills and metal processing, pulp and paper, timber, water treatment, as well as general engineering.
